# Assumptions (of the project plan)

Profit should be Maximum

Developer SuperStar

# Decrease ManHour effort for development \*AMAYC

\*AMAYC = As much as you can

# Decrease ManHour effort for development \*AMAYC

\*AMAYC = As much as you can

# Scenario

Developer SuperStar

Academic Institution and Govt. Offices  
are increasing day by day.

At the same time every  
Institution/Office going {{DESPERATE}}  
for the Basic IT Infrastructure to fulfill  
their need

Clouds in DRDO Bangalore  
Project Arrow of Postal Department  
BI tools in other PSU  
NCERT's SchoolOS  
Computerization of FCI

etc. are the example proving the same.

WB aim for clouds for e-Governance

Postal Department going for Core  
banking and facilitate basic office  
requirement software

Each of them have very different  
requirement ?

I Agree

But then

They all have one thing in common

They all need some common  
applications to harness cent % of their  
IT infrastructure

What those things

Developer SuperStar

Content Management System

Blog

eTendering

HRM

CRM

Reasearch Paper Repository

Virtual Library

Collaboration Suit

Academic ERP

E-Learning Suit

Mailing System

Blog

SSO over all application

Developer SuperStar

Designing all this will take years ??

No, Just several weeks of HARDWORKS

# Explain ?

Developer SuperStar

Just see this for explanation:

<http://egovstack.sourceforge.net/>

Use Open Source as Much as You can

And Do not forget to UPSTREAM  
commits

# Solution

Developer SuperStar

Application Bundled at  
<http://egovstack.sourceforge.net/>  
and

Available over IBM Customized Server  
(Plug and Play)

or

As SaaS over IBM Network (Public Cloud)  
(Pay and Use)

# Outcome

Developer SuperStar

For Institution OR Govt. Offices

Developer SuperStar

Everything from a Single Vendor , So  
ease of maintenance

Not much tension , easy to scale and  
explore

# Benefit for Organization

# 1. Bigger Market Impact

Developer SuperStar

2. \$

Developer SuperStar

Thanks
