

# Is Debian better then Ubuntu ??????

By : Gaurav Paliwal

/me = <http://www.gauravpaliwal.com>

This topic is even more debatable than making Mark Zuckerberg the person of the year and not Julian Assange

Decide on your own after  
the “next” few slides.....

10.10 on "10/10/10" is  
"released" {with double  
quotes}

The very next moment  
next door guy shouted ????

Why ???

That poor /next\_door\_guy  
uses i945 and radeon  
chipset

The glamour of 101010 has  
made the i945 and radeon  
chipset bug digest in  
#canonical stomach

You already have reason #1  
to ditch Ubuntu

But why have an affair with  
Debian :P :3

Reason #1

Because its not Linux it is  
GNU/Linux

Why you forget any distro  
based on Linux kernel is  
Linux kernel + most of the  
basic OS tools from the  
GNU project

So, No Linux only  
GNU/Linux

Reason #2

Stability and Security

Increased stability and  
security testing.

Debian is also one of the  
best platform for servers  
{depends on you}.

Debian {Stable} has no  
bleeding edge but it  
nonetheless functions well.

If you want to use  
“Bleeding Edge” use the  
Testing repos and /you be  
set in no time.

Not to forget Debian  
Testing and Unstable are  
more “Stable” than those  
who claims to be stable

Reason #2

Debian is an absolutely free software.

follows all the philosophies  
of the free software  
community

/me use Mozilla Firefox.  
Please close ur eyes for  
next slide.

they even rebranded the  
Firefox Iceweasel because  
the original Firefox  
consisted of a certain part  
that was copyrighted.

Reason #3

Debian supported many  
platform

Debian supported platform

>>>>>

Ubuntu supported platform

Reason #4

Debian is produced by a  
not-for-Profit firm

Remember Reason #1 to  
ditch Ubuntu

“This eliminates any  
loopholes in producing  
substandard products”

Reason #5

Debian is simpler to use.

\*Almost out-of-box

\*{Condition apply :P}

Other personnel Reason's

{Debra } G/F loves Debian  
{Ian Murdock } #1993

*Save your pocket money.*

The fact

Ubuntu is the organization  
which transferred the devils  
into human (#Linux) now  
make them Saint  
(#GNU/Linux)

Father has more  
experience than Son

Your Experience

????

# Others Experience

<http://linux.koolsolutions.com/2009/02/17/100-reasons-why-debian-is-preferred-over-ubuntu/>

Debian has the largest number of packages offered by any Linux distribution. – By Kushal

Debian changes less:Debian's upgrade system seems to be better and more suited for what I need in an operating system , as it doesn't change as frequent as Ubuntu , this way I know its going to work and be stable if I upgrade to the next major release of Debian. -By Charliebrownau

Ubuntu is too bloated and runs rather slowly on my pc. – By Nikhil

Debian way surpasses Ubuntu on the type of architecture that it will run on. that is why i prefer debian. – By Sleepy.

Debian is liberated – free as in freedom – from proprietary junk software. – By Peter

The debian can be used both for desktop, server & netbook. Ubuntu has different distro for different audience (desktop, server, netbook). – By Zahid

Debian has been built by the community. Ubuntu was heavily funded. Nothing beats a solid committed community. It's been estimated that if you were to pay to build Debian 4.0 it would cost around 10 billion dollars. That's quite a community. – By Dan

switching to debian because my friend kept calling me a noob for using ubuntu :P – By  
Hintss

Are you ready for the  
#TRANSFORMATION

Linux to GNU/Linux  
Ubuntu to Debian

Thanks for having the {HUGE} patience  
of listening to /me.
